

# Dynavista

**CAA V5 based**  
**V10.2 / V11.2**

**Overview**

**January, 2012**

**UNIADEX, Ltd.**

# Concept of Dynavista (1)

***Innovation of mold/die development!!  
Realization of extreme optimization,  
automation  
and synchronization  
of mold/die development processes  
by incorporating LEADING EDGE  
Japanese technology  
on top of world de facto CAD platform.***

# Concept of Dynavista (2)

Conventional product development

Product design

Mold/Die design

Mold/Die manufacturing

**Dynavista** development

## Dynavista

Extreme simultaneous engineering  
enables drastic reduction of  
development time

Product design

Mold/Die design

Mold/Die manufacturing

Front loading of processes and quality  
Reduction of development time by  
automation and optimization

Reuse of digital  
design know how

Evaluation of  
machinability and  
formability  
at design phase

Automated modeling  
by the use of  
templates and standard parts

Automatic parametric  
reconstruction to cope with  
design changes

Formability consideration  
Automatic addition of machining  
attributes  
Best suited CAM shape creation

Machining feature based  
automation of machining

Automatic, best suited  
path calculation to cope with  
design changes

Dynavista

# Dynavista Road map

# Worldwide support

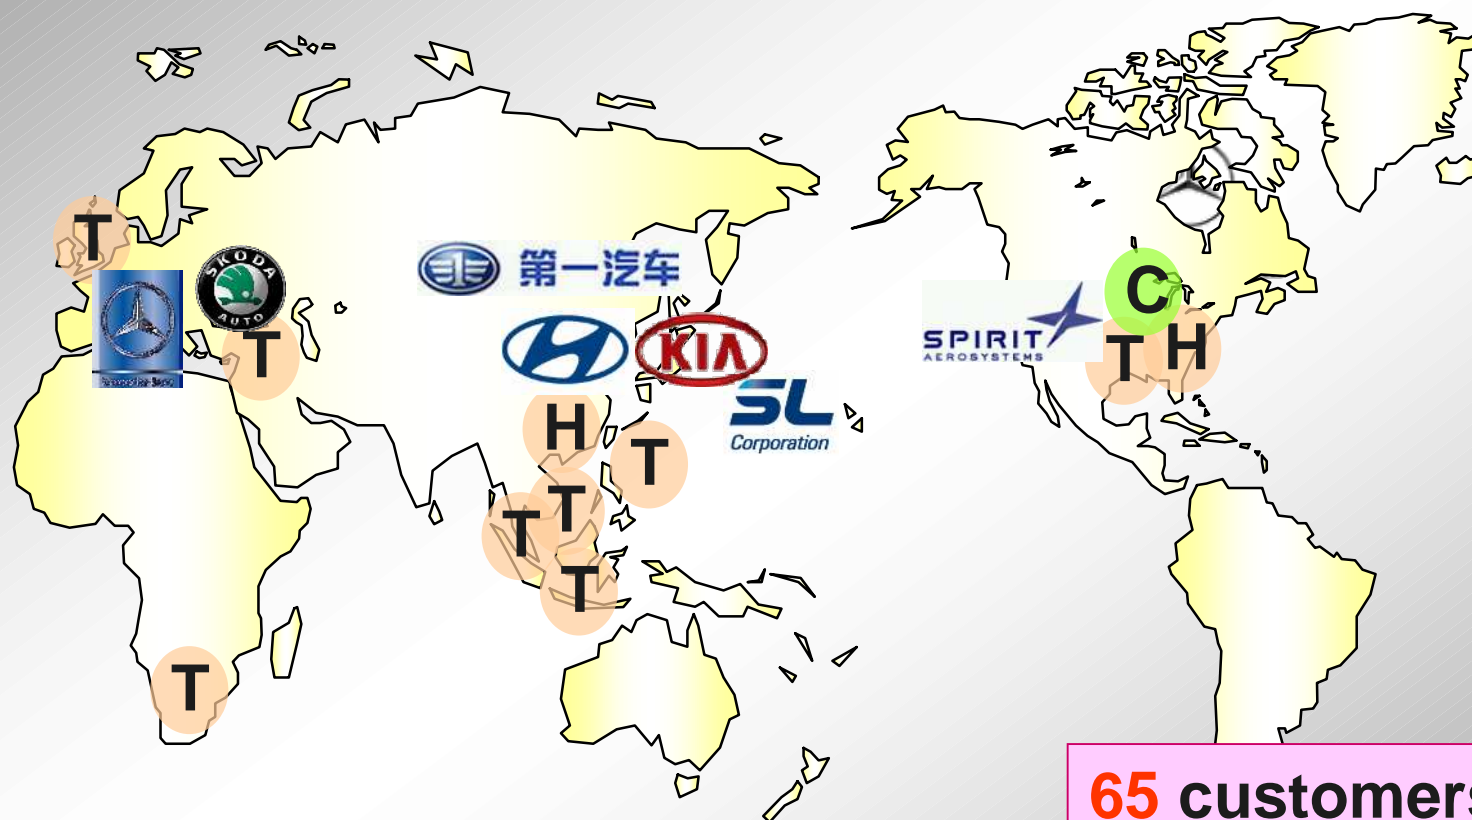

- Europe ... CENIT
- Czech ... Dytron
- Turkey ... Grup, CADEM
- South Africa ... CDC
- North America ... GVT, FTI
- Brazil ... TECMES
- Korea ... RICH IT
- China ... FS Jiangda
- Taiwan ... Arfartech
- Thailand ... NSS
- Indonesia ... NSI

**"Mold & Die Design & Manufacturing  
Worldwide Availability"**

# Major customers

-  : Japanese
-  : non Japanese

**65** customers  
**350** licenses  
**Outside Japan**

# Dynavista Modules

## Die Layout Design Package

### Dieface Design

High performance die face shape creation and evaluation

- Easy trial&error
- Flange expansion, etc.

**Dieface Design**

### Formability Fillet

Creation, embedding and edition of fillets

- Significant extensions to V5 functions in functionality and robustness

**Formability Fillet**

### Formability Shaper

Advanced die modeling (Formability, productivity)

**Formability Shaper**

### DieStructure Design

Whole process support in die design

- Die specific shape (back face, sectional die)
- Collective parts placement (BOM creation)
- Machining attribute (integrate CAD/CAM)

**DieStructure Design**

### Mold Design

Whole process support in mold design

**Mold Design**

### Die CAM 2.5D

Optimum machining for a die structure

- Optimum tool path for each machining area with interference check

**CAM 2.5D**

### Die CAM 3D

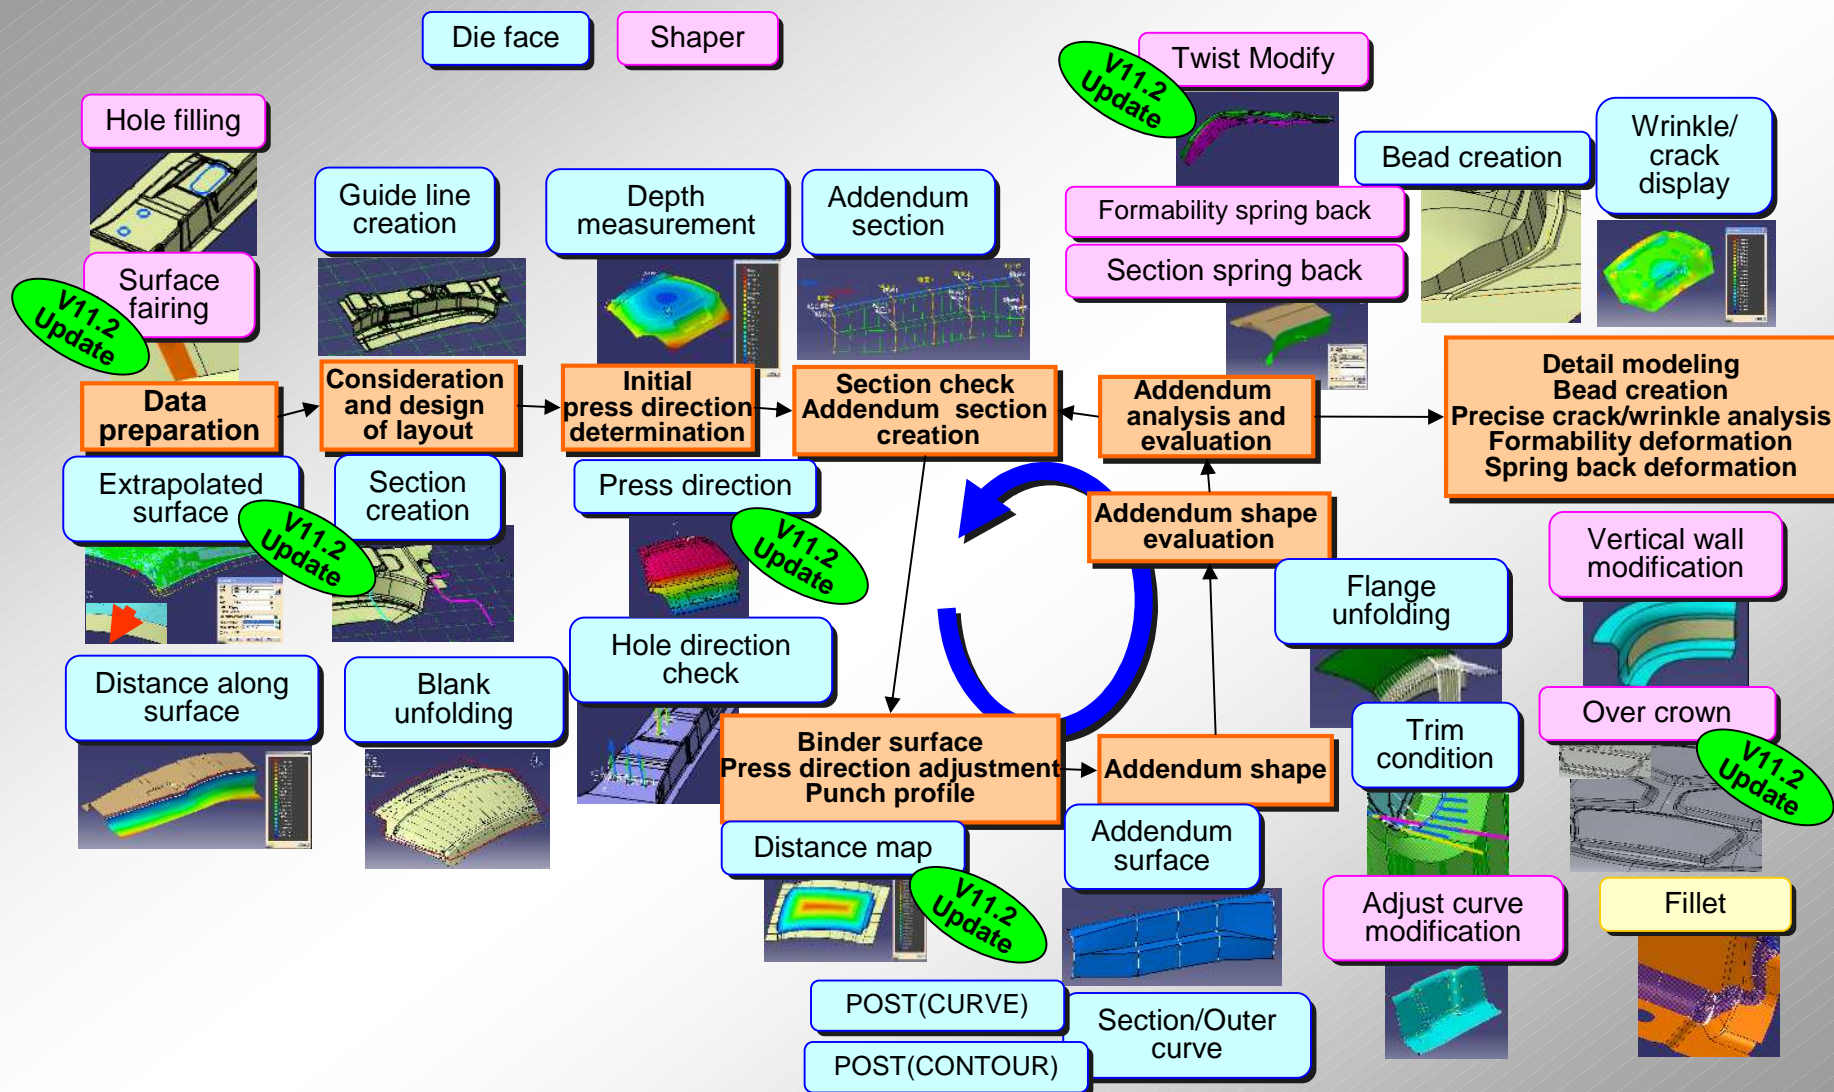

Sculptured surface machining CAM

**Die CAM 3D**

# Dynavista functions for die layout design

# Formability Fillet

***High performance and robust fillet creation for complex support shape environment.***

- **High robustness**

It uses specifically developed own geometric engine for supporting fillet functions.

- **Variety of functions**

1. Fillet options such as variable radius, chord length specification, curve passing fillet, three tangent fillet and Gradation, etc. are provided.

2. Variable radius/ independent end conditions/ arbitrary stop position, etc. are commonly provided to all the functions.

- **High flexibility**

Separate or combined running of fillet creation/edit of existing fillet/ merger of fillets to base shape are provided, which supports high quality and efficient fillet creation work.

**V5R18**

**V5R19**

**V5R20**

**CAA<sup>V5</sup>**  
BASED

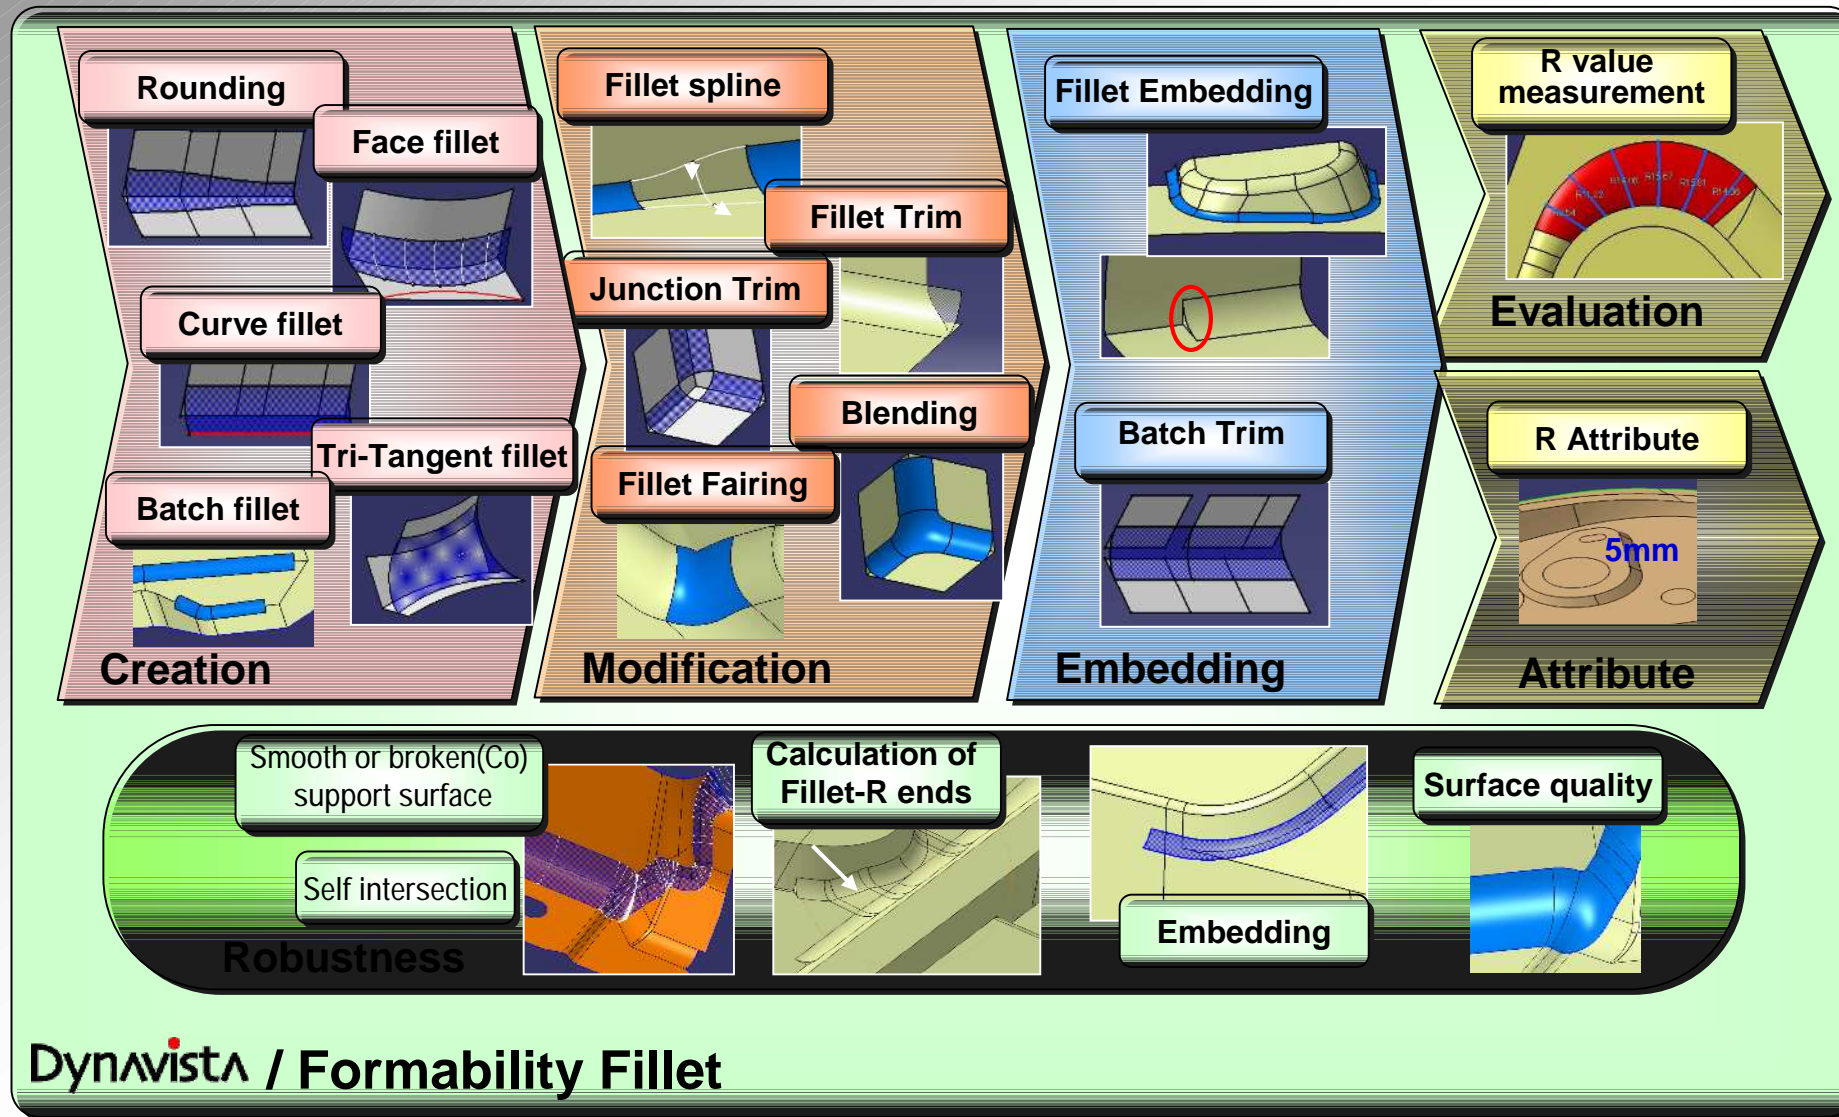

**V5 prerequisite: GSD**

Production level evaluation by some Japanese automotive OEM(N) shows 1/3 of panel modeling man hours is spent for fillet modeling and 3-5 times reduction is obtained by Dynavista against CATIA V5 fillet.

**Dynavista**

# Formability Fillet command

# Dieface Design

*Improvement of efficiency and quality in die face design.*

V5 prerequisites: HD2

- Drastic reduction of design man-hour by specific functions for die face shape - such as shape creation, edition and evaluation.
- Design quality can be automatically build-in by evaluation before production with the effective use of design know-how.

Analysis

# Formability Shaper

***Estimation of large deformation of panel after forming - Formability Shaper.***

- Sophisticated die shape deformation functions which drastically decrease die design time.
- Simple input for gaining deformed shape.
- Strong surface deformation functions which preserve characteristics of original surfaces.

 **V5R18**

 **V5R19**

 **V5R20**

Dynavista / Formability Shaper

# Die Structure Design

***Die Structure Design automates stamping die structure design.***

- Complex shapes are automatically created such as sectional die and back face, etc.
- Automatic creation of parts list enables association with BOM.
- CAM automation achieved by attribute association with 2.5D/3D CAM.

**V5 prerequisites: MD2**

 **V5R18**

 **V5R19**

 **V5R20**

# Die Structure Design command

# Mold Design

***MoldDesign automates mold die design.***

- Functionality covering both from small to large mold parts.
- Hybrid design of 2D and 3D design method.
- Various standard parts featuring information useful for manufacturing and procurement.
- Automatic creation of parts list enables association with BOM.
- CAM automation achieved by attribute association with 2.5D/3D CAM.

**V5R18**

**V5R19**

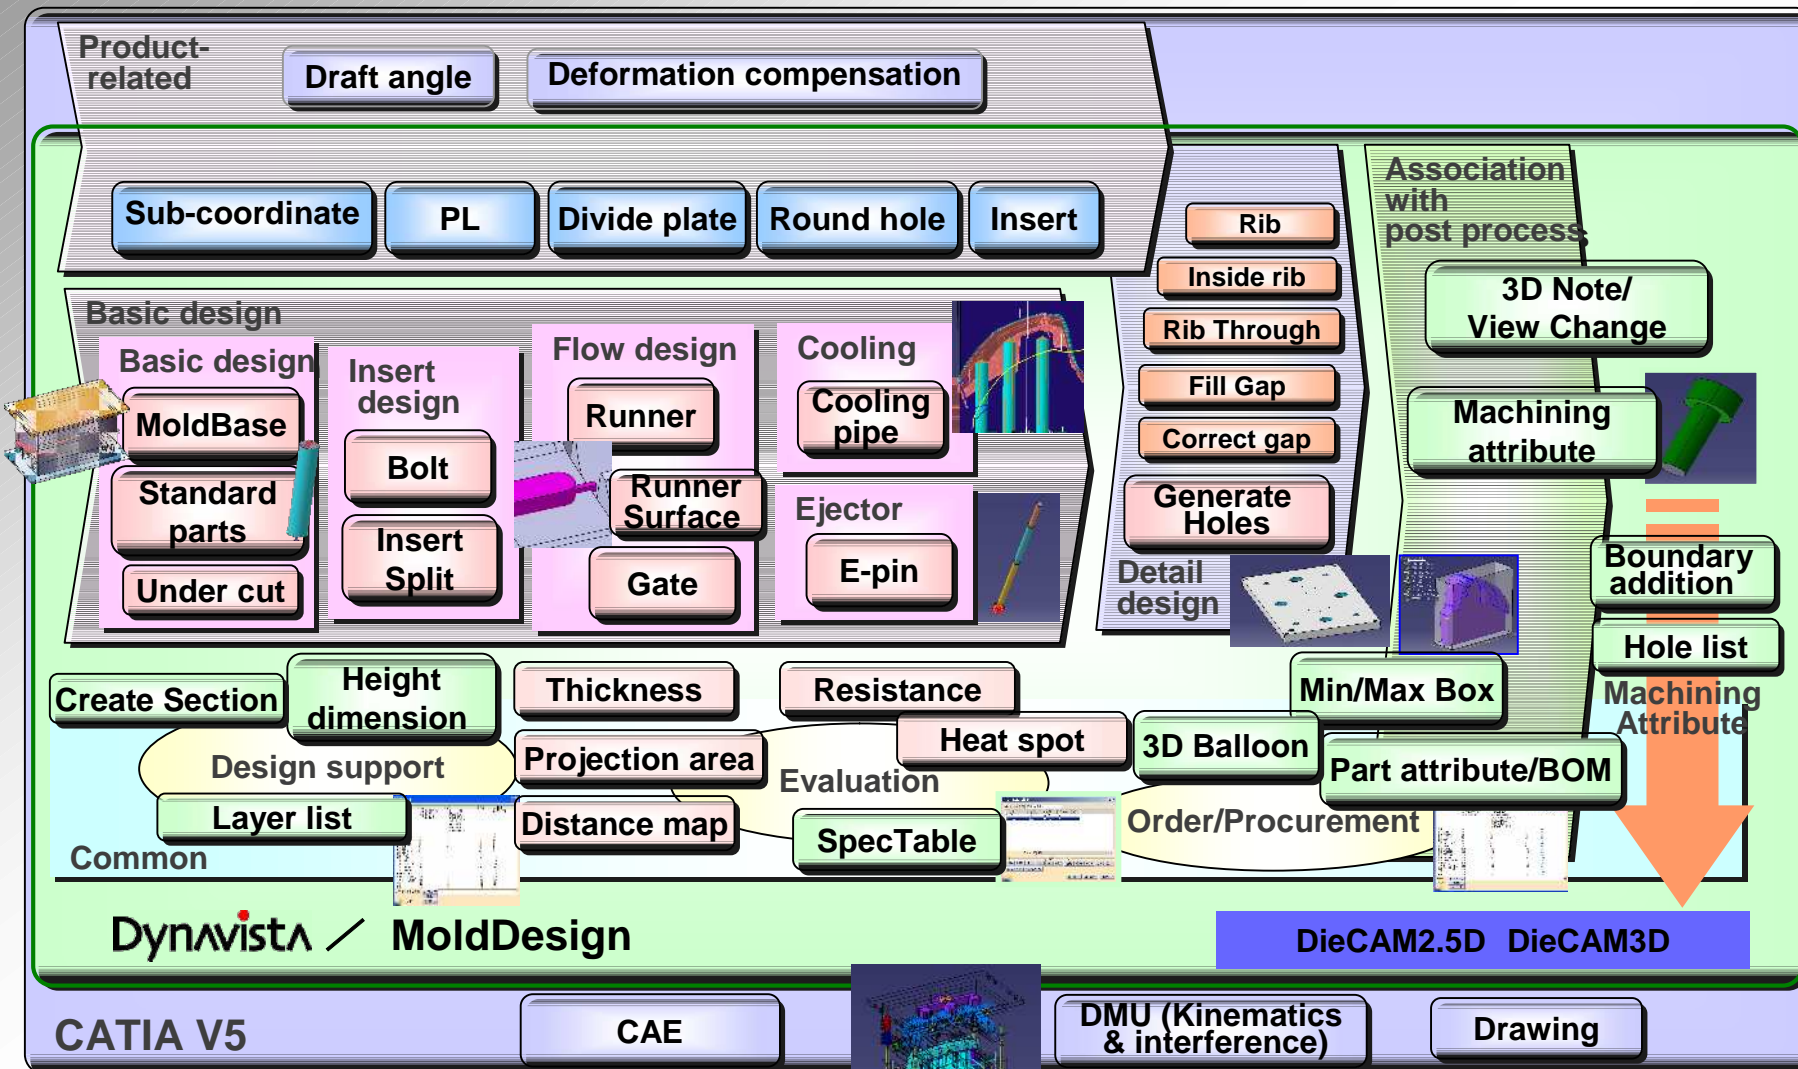

**V5R20**

**V5 prerequisites: MD2 (or HD2)**

# Mold Design command

# Die CAM 2.5D

***Die CAM 2.5D/CAM 2.5D automates and optimizes machining for die structures.***

**V5 prerequisites: MD2**

- Interference-free tool paths are calculated by taking tool changes and attachment changes into account.
- Various machining operations especially for die structure machining.
- Automatic recognition of machining area and automatic selection of machining process and tool by the attribute association with DieStructure Design or MoldDesign.
- Machining sequence optimization taking efficiency and quality into account.

**V5R18**

**V5R19**

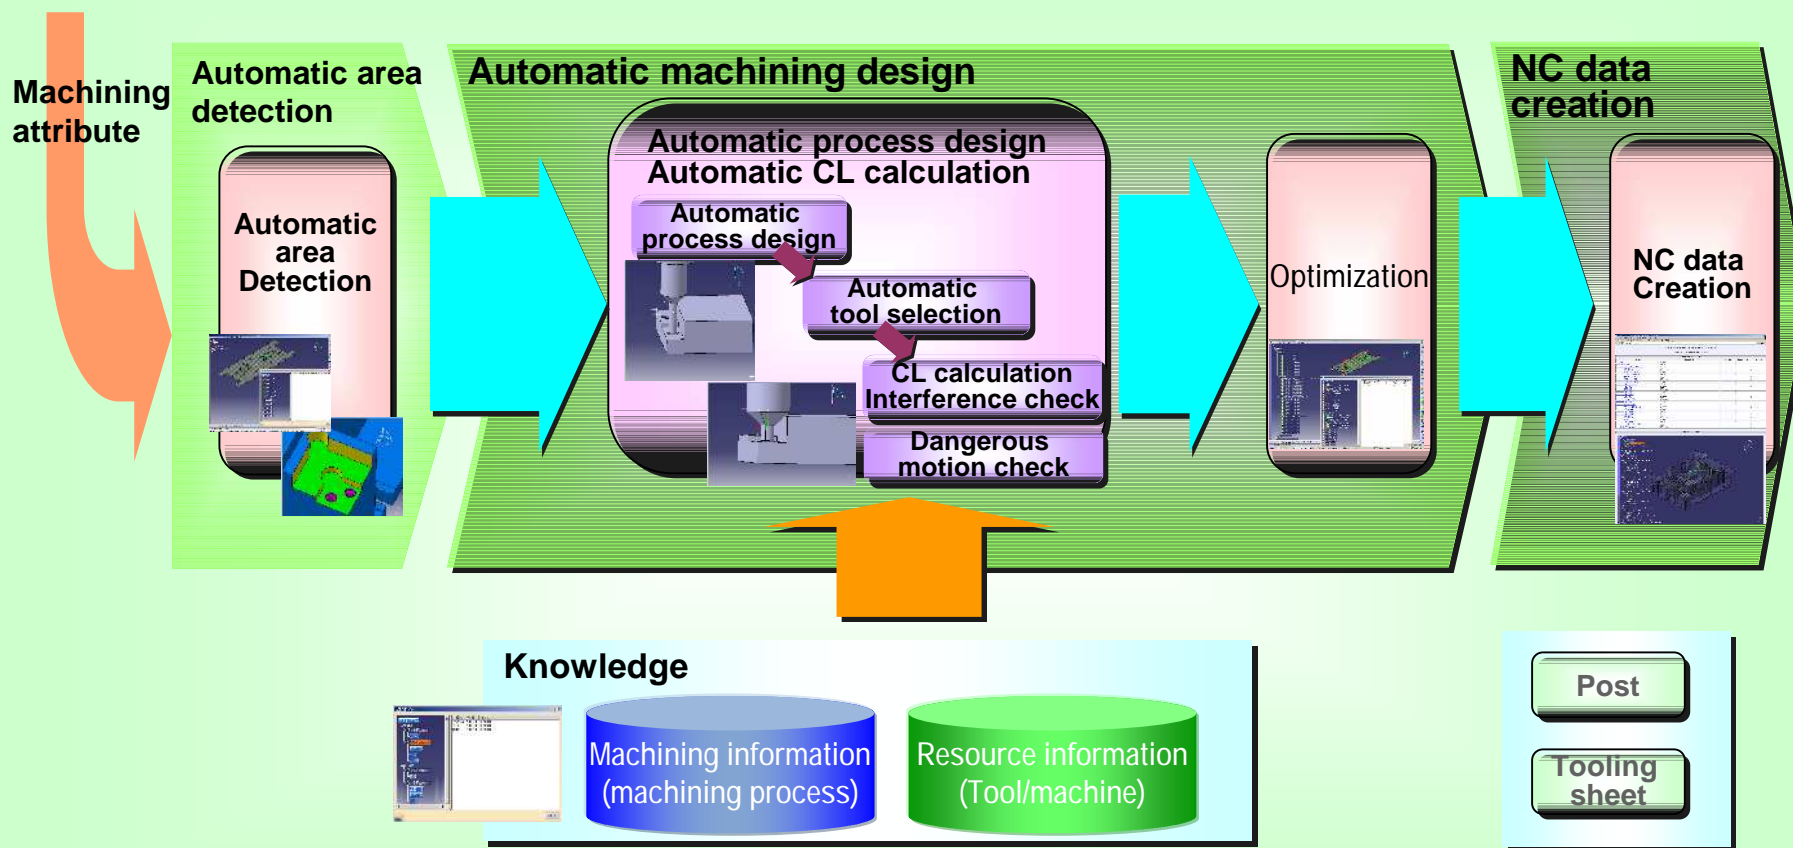

**V5R20**

# Die CAM 2.5D command

## DieStructure Design/Mold Design

Dynavista / DieCAM 2.5D

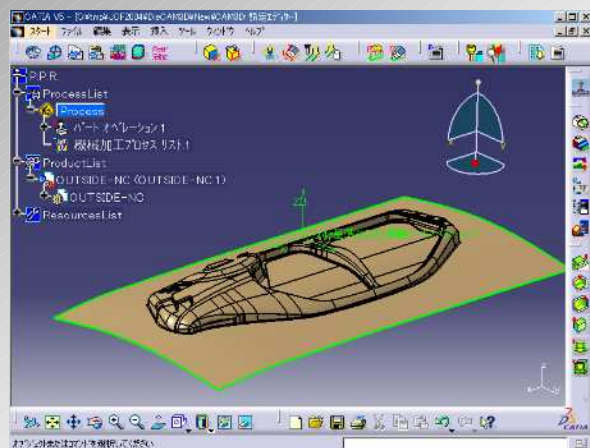

CATIA V5

# Die CAM 3D

***Die CAM 3D/CAM 3D automates and optimizes machining for die product shape.***

**V5 prerequisites: MD2**

- Various machining operation with users machining know-how.

- Interference-free tool paths are calculated by taking tool changes and attachment changes into account.

- Efficient NC data optimizing machining sequence and air cut.

- Many support functions to improve work efficiency.

**V5R18**

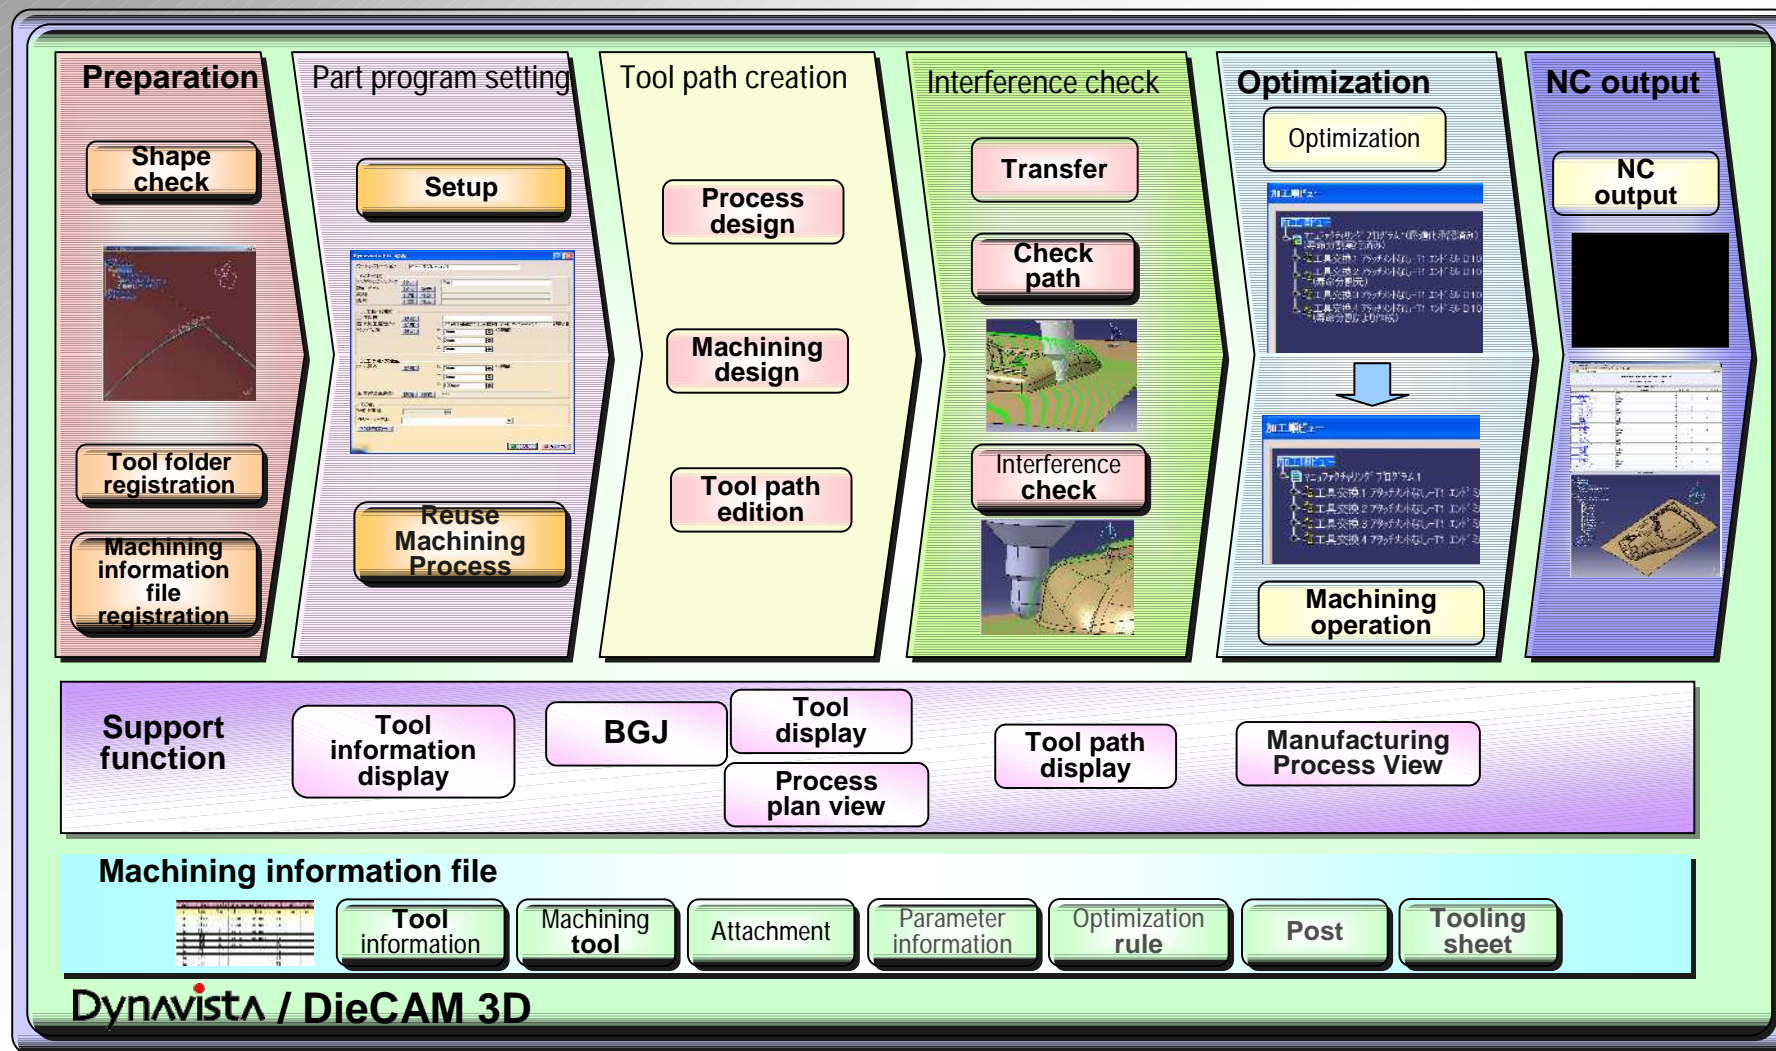

**V5R19**

**V5R20**
